

PLEASE NOTE:

There will be a 60mm (approx) gap between the label ends as a 'viewing window' as discussed.
 Please keep all text and critical graphics 5mm from the edge of the label
 It is recommended to keep all text and critical graphics 15mm from the top edge of the label. This is so that text is not obscured by the Barrel Skirt when looking down on to the barrel from above
 Please provide 5mm Bleed all around
